Overview

We’re looking for a talented digital artist or UI asset designer to create premium collectible cosmetic assets for a mobile app. The assets will be used as profile customization rewards, including avatar frames, title tags, and profile banners.

The app has a sports/game-inspired feel, so the designs should feel fun, collectible, and rewarding while still looking polished, clean, and high quality. We want cosmetics that users would actually want to earn, equip, and show off.

This is not a full app UI design project. We are specifically looking for high-quality cosmetic assets that can be dropped directly into the app.

Style Direction

We want a premium sports/mobile game reward style. Think collectible badges, ranked rewards, avatar frames, rare titles, founder rewards, championship-style banners, and profile cosmetics that feel exclusive.

The style should feel:

* Premium
* Modern
* Clean
* Sports-inspired
* Collectible
* Rewarding
* High quality
* Desirable to unlock

Possible visual directions include metallic silver, gold, and diamond founder tiers, trophy/championship-inspired designs, sleek 3D-style tags, dark UI assets with orange/gold/silver/blue accents, and limited-edition reward cosmetics.

The assets should not feel cheap, cluttered, overly childish, or like basic flat icons.

Key Deliverables

We are looking for an initial set of:

Avatar Frames

Frames that sit around a user’s profile picture.

Examples:

* Silver Founder Frame
* Gold Founder Frame
* Diamond Founder Frame
* Standard Frame
* Rare Frame
* Streak Frame
* Hall of Fame Frame
* Limited event frame

Frames should be delivered as individual transparent PNGs with clean edges and consistent sizing.

Title Tags / Badges

Tags that users can display next to or under their username.

Example tag ideas:

* Founder
* #IKnowBall
* Film Room
* Tape Don
* Street Cred
* Hoop Scholar
* Ball Knower
* Clutch Gene
* Heat Check
* Hall of Fame
* Rookie
* Pro
* Elite
* Legend

Tags should feel collectible and tiered. Some can be simple/common, while others should feel rare, premium, or limited.

Profile Banners

Horizontal banners users can equip on their profile or leaderboard card.

Examples:

* Founder Banner
* Diamond / Gold / Silver tier banners
* Championship Banner
* Sports-card inspired banner
* Clean premium dark banner with orange accents
* Trophy / Hall of Fame inspired banner
* Limited event banner

Banners should work behind username/profile content and should not be too busy where text becomes hard to read.

File Requirements

Final files should include:

* Transparent PNGs for individual assets
* High-resolution source files
* Editable source files, preferably Figma, PSD, or AI
* Consistent sizing across each asset type
* Clean file naming
* Optional preview sheet showing all assets together

All assets should be export-ready and easy for a developer to implement.

First Paid Test

We would like to start with a small paid test batch:

* 3 founder avatar frames: Silver, Gold, Diamond
* 3 matching founder title tags: Silver Founder, Gold Founder, Diamond Founder
* 2–3 additional title tags, such as #IKnowBall, Film Room, and Hoop Scholar
* Optional: 1 founder-style profile banner concept

If the first batch goes well, there is potential for ongoing work creating more cosmetics, event rewards, seasonal items, and premium shop assets.

Ideal Timeline

Suggested timeline:

* Day 1: Review references and confirm direction
* Days 2–4: Create first concepts
* Days 5–7: Revisions and final exports

We’re looking for someone who can move quickly, communicate clearly, and deliver clean, polished assets.

How to Apply

Please send:

* Examples of similar badge, cosmetic, avatar frame, or game UI work
* Your estimated timeline
* Your pricing for a small test batch or full pack
* What files you typically deliver
* Whether you can provide transparent PNGs and editable source files

Bonus if you have experience designing cosmetics for mobile games, sports apps, fantasy apps, social apps, or profile customization systems.
