	Details	
Project Name	Humm	
Domain/URL	-	
Client Name	Natasha	
Country	South Africa	
Niche Project Category	Wellness & FemTech (Mental wellness, self-care, and daily rhythms).	
Product Type	Premium, editorial-feeling mobile application for routine curation and nervous system regulation	
Targeted Country/Region	Primarily targeting the USD 12.9–41.1 billion FemTech market	
Client Type	Early-stage/Product-focused (transitioning from manual tools to a dedicated app).	
Design/Development Scope	Full design and development of an MVP (V1) including glassmorphic UI, custom content library, and local-first data architecture.	
Project Scope Summary	Creation of a "soft OS" for women to curate routines without guilt or streaks. Includes a Habit Library, Rituals/Stacks, a 90-second "Reset Orb," "Journeys," and a "Bloom Scroll" (saved content feed).	
Client's Budget	Not Disclosed	
Client's Timeline	Not Discussed	
Client Expectations (for the proposal)	The client expects a collaborative refinement, seeking feedback on product, UX, naming, and technical feasibility	
PROJECT REQUIREMENTS	**Details**	
Technical Stack	I don’t have a rigid tech preference, but I do care about performance, scalability, and long-term elegance. Ideally: – Native iOS first (Swift / SwiftUI) for the most premium, fluid experience – A clean, scalable backend (Firebase or Supabase level simplicity for MVP) – Architecture that allows us to scale into Android later without rebuilding everything The user experience and performance matter more to me than the specific stack - but I want something modern, maintainable, and future-proof. *Possibly:* Frontend: SwiftUI (iOS first) Backend: Supabase (preferred) or Firebase Database: Postgres (via Supabase) or Firestore Auth: Native Apple Sign-In + Email Push: Firebase Cloud Messaging Storage: Supabase Storage or Firebase Storage (for future audio/video) Analytics: Mixpanel or Amplitude Payments: RevenueCat Crash Reporting: Sentry or Firebase Crashlytics	
Mobile/Tab Responsiveness	It's a mobile app	
3D & Motion Design	"Bloom" animations (soft, diffuse gradients) and slow, restrained expansion for completion moments.	
Interaction Animation	Micro-animations for ritual completion; haptic feedback mapped to breathing (vagal co-regulation).	
Prototyping	Required	
Theme Toggle	Required	

Target Audience	Women ages 25–45 who currently "Frankenstein" routines using Notes apps, Pinterest, and TikTok.	
Localization	English	
Client's Mention (Priority Requirements)	To ensure nothing critical is missed in V1, we also need confirmation that the following are explicitly included in both design and development scope: • Notification design (tone, copy, timing logic, quiet delivery aligned with the nervous-system-first philosophy) • Empty states (no ritual built yet, no saved items yet) • Error states (offline mode, sync delay, calm failure handling) • First-time Reset Orb guidance • First-time Bloom Scroll experience • Data persistence logic (what happens if a user misses days — no punitive resets) • Account / authentication flow (even if simple email-based login) Custom ritual and stack creation must have inline editing, day-specific frequency, and reordering - is fully included in the V1 design scope and screen count.	
Key KPI Metrics	Not discussed	
CLIENT PREFERENCE	**Details**	
Design Inspirations/References	Aesop (poetic restraint), Goop (luxury editorial), Glossier/K-Beauty (packaging aesthetic), Rupi Kaur (minimalist poetry), and Moon Juice.	
Client Recommended Competitors	Habit Trackers: Streaks, Habitica, Fabulous (noted as too "shame-based"). Mindfulness: Calm, Headspace (noted as lacking routine curation). FemTech: Flo (noted as too narrow).	
Client Recommended Competitors URLs		
Other Competitors	Not Provided	

Estimated Days for Research & Analysis	
Research & Analysis	**Details**
Requirement Analysis & Stakeholder Alignment	Align with Natasha vision
Generative User Interviews	- Deep-dive sessions focusing on "Energy Windows" (e.g., Low energy vs. High energy days) and the vocabulary users use for self-care. - Informs the Tone & Voice strategy and ensures the "Editorial" content feels authentic rather than clinical.
Somatic UX Testing (Low-Fi)	Test the "Reset Orb" and "Micro-celebrations" using wireframes to see if visual "blooms" actually lower heart rates or perceived stress.
Moodboard	Defining the "Visual Soul" of Humm through textures, light, and depth.

Estimated Days for Design (62+ Pages/Screens)		Page/Screen Count	Strategic Animation / Motion Suggestion
Customer Journey	**Page/Screen Name**	**26**	
Design System Foundations	Color Palette & Typography Scale	-	
	Token Setup & Core Components (Buttons, Inputs, Cards, Navigation)		
Brand Identity	Logo Suite & Wordmark		
	Photography Style Guide		
	Background from Wisdom Drop/Nourish Dose, Habits etc		
The "Atmospheric" Onboarding			
Splash/Entry (Logo Animation)	Minimalist logo animation with a animated background(Bloom/3D animation/Motion).	1	
Atmosphere Choice	Selection of color themes (Peach, Sage, Lavender).	1	The "Glow Bleed": As a user taps a theme, the color should bleed slowly from the touch-point to fill the background like ink in water.
	Here's a gentle way to begin today Preloaded ritual Wake & Hydrate Morning Light Anchor Breath Gratitude Moment CTA: Try Any/ Try All/Skip/Add this as habit.	4	
Gentle Start Review (Showcase the list of habit based on feeling)	Micro Celebration	1	
Almost Done!! Energy Windows (Core personalization)	Input for Morning/Evening start times. Morning window (default 5:00–10:59) Evening window (default 6:00–midnight)	1	The background gradient subtly shifts its "sun position" as the user adjusts the time toggles.
Permission Flow	Soft-toggle for notifications (phrased as "Gentle Reminders").	1	
Preparing Loading	Loading Animation	1	
The Daily Pulse (Morning/Evening Execution)			
Home: Morning (Default)	Default "Golden Hour" view with Rhythm Switcher, Stack Cards, Habits	1	
Home: Evening	"Midnight Velvet" view with reflection prompts. Stack Cards, Habits	1	
The Quick Switcher (Excluding Any Animation)	Overlay/Pill toggle for "Slow" vs. "High Energy" Rhythms.	1	
Expanded Stack	Vertical view of habits within a specific stack. • Tap to expand • Inline editing • Drag to reorder • Day-specific frequency (e.g., M/W/F) • Notes • Partial completion support Inline editing is non-negotiable.	1	
Habit Detail	Individual habit cards with "Editorial" tips/science. Clear "why" (nervous system + holistic benefits) Simple "how" Kind Ritual Tip (e.g., "swap watercress wherever you'd usually reach for lettuce") Optional light reference (e.g., Huberman protocols)	4	
The Reset Orb	Full-screen somatic breathing interface (90s tool).	3	
Curation & Discovery (The Library)			

Estimated Days for Design (62+ Pages/Screens)		Page/Screen Count	Strategic Animation / Motion Suggestion
Customer Journey	**Page/Screen Name**	**26**	
Library Main	Grid/List of categories (Circadian, Somatic, Digital Detox)	1	The Library isn't a database or a to-do list. It's designed to feel like: a calm wellness magazine a trusted reference you return to a place to learn, choose, and adopt habits at your own pace You don't need to do everything. You don't need to read every word. You simply explore, add what resonates, and let your rituals evolve naturally over time.
Category Detail	Filtered list of editorial habit cards.	1	
Habit Detail(Home)	Individual habit cards with "Editorial" tips/science. Clear "why" (nervous system + holistic benefits) Simple "how" Kind Ritual Tip (e.g., "swap watercress wherever you'd usually reach for lettuce") Optional light reference (e.g., Huberman protocols) CTA Perform Add to Stack		
Bloom Scroll Feed			
Bloom Scroll Feed	• Saved items feed • Save from Wisdom Drops / Nourish Dose / Mantras etc • Simple resurfacing logic		Liquid Scroll: A momentum-based scroll where cards have a slight "floaty" physics, as if submerged in water.
Journeys			
Journey Explorer	Overview of 7-21 day Journeys Title Duration Short description Tap → Journey Detail Screen: Full description Habits used in this Journey (e.g., Morning Light, Anchor Breath) Start Journey Share Journey (native share sheet)	1	
Journey Active	Timeline view of a journey without "streak" counters.	1	
Content Detail	Full-length article/guide for a specific ritual. Title Duration (e.g., 7 days) One-paragraph description Progress bar (Day X / Y) Soft: missed days pause, they never reset	1	
Profile			
Profile View	• Name edit • Theme toggle • Notification toggle • Energy window edit • Reduced motion toggle		
Daily Content			
Today's Wisdom Drop	Short, editorial insight (Daily) (Native Share + Save to Bloom.)		
Today's Nourish Dose	Science-backed educational card ((Native Share + Save to Bloom.))		

Estimated Days for Design (62+ Pages/Screens)		Page/Screen Count	Strategic Animation / Motion Suggestion
Customer Journey	**Page/Screen Name**	**26**	
Content Detail View	Full editorial view (Standalone).		
Foundations			
Authentication	Simple Email Login / Sign up.		
Empty States	"No Rituals Yet" / "Vault Empty".		
Calm Failure	Offline / Sync Error screens.		

Estimated Days for Deliverables	
Deliverables	**Details**
Dev Hand-off	- Standardized Woodmart-compatible UI elements (Buttons, Cards, Forms). - Strict mathematical definitions for "Whitespace" to ensure a professional look. - Defined H1–H6 and Body scales with specific line-heights for readability. - Production-Ready Visuals
