SCOPE RECOMMENDATION v2

Last Updated: Mar 6, 2026

P0 — Launch (Ready to Use & Validate)

Everything needed for a working marketplace. Customers book, vendors serve, admin manages.

Additionally, **essential marketing and analytics tools are included** so the platform can support early user acquisition and operational monitoring from the start.

Customer App (Mobile + Website)

#	Feature	What it does
1	Sign Up & Login	Register with Google, Apple, or WhatsApp. Email verification. Profile setup. First-time intro slides. Guest Login
2	Browse Services	View service categories, search for services/vendors, see featured providers, select location
3	Book a Service (Same vendor, multiple booking)	Step-by-step: pick category → pick service → configure options → pick date/time → enter address → professional assigned → review & confirm. Cart system: add multiple services from the same vendor
4	Choose Professional	System auto-assigns best available professional. Customer can switch professionals if available
5	Checkout & Pay	Order summary → pay with Card, Cash, Google Pay, or Apple Pay. Payment held until vendor accepts
6	Manage Bookings	View active and past bookings with real-time status updates
7	Cancel or Reschedule	Platform cancellation policy shown before confirming
8	Chat with Vendor	Per-booking chat with text and photo support

9	**Customer Support Chat**	Integrates with Chatwoot or similar third-party service for live chat support from customer support team via mobile and web app
10	Rate & Review	Rate Vendor after service
11	Notifications	Booking confirmation, vendor acceptance/rejection, reminders, service started, completed, cancellation
12	Saved Addresses	Save multiple addresses with GPS detection
13	Wallet	Admin-granted credits usable at checkout
14	Wishlist / Drafts	Save a service for later
15	Coupon / Promo Codes	Apply discount codes during checkout
16	Basic Search Filters	Filter services by rating, price range, and availability

Vendor Portal (Web)

#	Feature	What it does
17	Dashboard	Revenue summary, bookings overview, quick stats
18	Manage Bookings	Accept/reject booking requests and assign professionals
19	Manage Services	Create/edit services with pricing and duration
20	Manage Staff	Add/remove professionals and assign services
21	Set Availability	Define working hours and off-days
22	Cancellation & Reschedule Policy	Vendors may configure their own cancellation policies
23	Chat with Customers	Per-booking chat with customers
24	Customer Support Chat	Access customer support chat from within the vendor portal to manage customer inquiries via third-party service (Chatwoot or similar)

25	Schedule Calendar	Day/week/month booking calendar
26	Earnings & Payouts	View revenue, commission breakdown, export earnings

Admin Portal (Web)

#	Feature	What it does
27	Dashboard	Platform-wide stats: revenue, bookings, vendors, users
28	Manage Vendors	Create vendor profile, approve or suspend vendors
29	Manage Users	View/edit users and booking history
30	Manage Bookings	Override booking status and reassign vendors
31	Service Categories & Forms	Configure service categories and booking input fields
32	Default Cancellation Policy	Platform-wide cancellation rules
33	Payouts & Commission	Platform-wide commission settings
34	Coupon Management	Create and manage promotional coupon codes
35	Notifications	Configure email, push, and in-app notifications
36	Content Management	Manage homepage banners and static pages
37	Platform Settings	Configure vendor acceptance timeout
38	Data Export	Export bookings, vendors, and user reports
39	Audit Logs	Track admin actions and system changes
40	Booking Analytics	Track cancellations, refunds, vendor response rates

41	Customer Support Chat	Access and manage live customer support chat via a third-party service like Chatwoot in the admin panel. Handle customer support issues effectively

Planned for Later

P1 — Full Platform Expansion

This phase includes the remaining growth features and advanced capabilities after the core platform is validated in P0.

Feature	Why it waits
Flash Deals / Campaign Deals	Marketing campaigns and promotional deal sections
Advanced Marketing Pages	Top deals, trending services, promotional sections
Chat Enhancements	Voice messages, file sharing, typing indicators
Vendor Performance Metrics	Track acceptance rate, response time, cancellation rate
Advanced Search Filters	More powerful service discovery
Improved Calendar Management	Drag-to-reschedule and staff filtering
Vendor Subscription Model	Monthly plans for vendors to boost visibility
Recurring Bookings & Auto-Pay	Automatic repeat bookings
Cross-Vendor Multi-Service Cart	Allow services from multiple vendors in one order
AI Recommendations	Personalized suggestions based on booking history
Referral Tracking	Referral-based user acquisition
Calendar Sync (Google & Microsoft)	Vendor calendar integrations
Voice Booking (Arabic)	Voice-driven booking

Vendor API & Webhooks	API access for enterprise vendors
