Project Brief: Skill-Based Cash Gaming App

Reference: Blitz — Win Cash. Please quote against the three scope tiers in Section 5.

1. Summary

Mobile (iOS + Android) skill-based cash gaming platform modeled directly on Blitz — Win Cash. Players warm up in free practice, then enter paid head-to-head matches and tournaments against other real players. Monetization comes from entry-fee rake plus a stack of deposit funnels (starter pack, never-ending sale, piggy bank, level-up packs), an in-app store, and a card-collection meta-game with player-to-player trading.

Please quote each of the three tiers in Section 5. Use the feature list in Section 2 as the baseline; the only thing that changes between tiers is game count.

2. Core Features (Required in All Tiers)

Wallet & Payments

- Real cash, Bonus Cash, and Gem balances visible in top bar.
- Deposits via Apple Pay, PayPal, and card; deposit-match Bonus Cash bonuses.
- Withdrawals to PayPal / Venmo / Apple Pay / bank, KYC-gated.
- Ledger separating real cash, bonus cash, and gems with their own withdrawal rules (bonus cash plays through; gems are non-withdrawable).

Game Layer

- Free practice mode and cash mode for every game.
- Every game runs on a tournament system — no head-to-head waiting rooms.
- Fully asynchronous matchmaking: players never wait for an opponent. Each player completes their run on a deterministic shared seed; results are written to the tournament as they come in, and payouts settle progressively as final standings resolve.
- Score breakdown screen (base, streaks, completion bonus, time bonus), high-score tracking, rank flair.
- Server-authoritative scoring + replay capture for disputes.

Engagement & Monetization Hooks

Examples of monetization and retention mechanics to include (this is the pattern — the final list will include these and similar variations):

- XP / level system with one-time level-up reward pack offers.
- Score-tier leaderboards with gem and bonus-cash payouts.
- Daily missions and challenges.
- Free daily prize wheel and a separate ticket-gated premium wheel.
- Out-of-tickets purchase modal with tiered bundles.
- Piggy bank that fills with play and unlocks for a cash purchase.
- Gamified deposit funnel with locked tiers and free intermediate rewards.
- Daily login card pack openings.
- Limited-time event offers with countdown timers.
- Referral program with bonus cash.
- Etc. — vendor is encouraged to propose additional standard hooks from the genre.

Social

- Sign-in with Facebook, Apple, and Google.
- Friends list with friend invites and gifting.
- Global, friends, and weekly leaderboards across all games.
- Clans / teams with clan chat, clan leaderboards, and clan-vs-clan tournaments.
- Player profiles with avatars, stats, badges, and trophy case.
- Share-to-social hooks for big wins and rank-ups.

Card Collection Meta-Game

- Themed albums with sub-collections, multiple cards per set, with rarity tiers.
- Album rewards on completion (cash + gems + cosmetic frame).
- Card Shop and Trade Center for player-to-player trading.
- Dedicated soft currency for unlocking and trading cards.
- Limited-time event albums.

Store

- Cash bundles ($3 / $5 / $15+) with bonus-cash percentages.
- Gem bundles, Starter Pack.
- Free gems via rewarded video.
- One-time level-pack offers with countdown timers.

Compliance & Admin

- 18+ gating, T&C acceptance, geo-blocking (AR, MI, MT, LA, TN cash play disabled; free play allowed).
- KYC at first withdrawal (Persona / Veriff / Jumio).
- Anti-cheat: server scoring, replay validation, multi-account detection, device fingerprinting.
- Admin console: user search, manual credits/debits, fraud queue, payout review, contest scheduler, A/B test config, 1099 generation.
- Responsible-play tools: deposit limits, self-exclusion, session reminders.

3. Game Inventory (15 Total)

All games run on the async tournament system, with practice + cash mode, deterministic seeds, server scoring, and replay capture.

#	Game	Type	Complexity
1	Bingo	Number / luck-skill	Medium
2	Solitaire	Card	Low
3	Tripeaks Solitaire	Card	Low
4	21 / Blackjack	Card	Low
5	Gin Rummy	Card	Medium
6	Poker Blast	Card	Medium
7	Flip 12	Card / number	Low

8	Match 3	Puzzle	Medium
9	Tile Match	Puzzle	Medium
10	Bubble Shooter	Arcade	Medium
11	Ball Blast	Arcade	Medium
12	Collect 'em All	Puzzle	Medium
13	Domino	Tile	Medium
14	Paper.io	Arcade / territory	High
15	Wheel of Cash	Casino-style	Low

4. Platform & Stack

- **Platforms:** iOS and Android, single codebase preferred.
- **Game engine:** Unity preferred for game layer.
- **Backend:** Node.js or Go; PostgreSQL; Redis for matchmaking & leaderboards; WebSockets for live state.
- **Payments:** Apple Pay, PayPal, Venmo, Stripe; ACH via Plaid.
- **KYC:** Persona, Veriff, or Jumio. Geo via MaxMind.

Open to vendor recommendations on stack.

5. Scope Tiers — Quote Each One

All tiers include the full Section 2 feature set. Game count is the only variable.

Tier	Games	Suggested Mix	My Notes
A — MVP	1–3	Solitaire, Bingo, Tile Match	Launch-ready product, prove the loop
B — Standard	4–8	Above + Match 3, Bubble Shooter, 21, Flip 12, Bingo variants	Competitive feature breadth
C — Full Parity	10–15	Full inventory in Section 3	Direct Blitz competitor

6. What to Include in Your Quote

- Total cost per tier (fixed-bid preferred).
- Cost breakdown: design, iOS, Android, backend, admin, payments/KYC, QA, PM.
- Timeline with milestones (design, alpha, beta, store submission, launch).
- Team composition and seniority.
- Assumptions and exclusions — what is NOT in the bid.
- Monthly post-launch hosting and third-party run-rate estimate.
- Two relevant portfolio examples (real-money or sweepstakes preferred).
- Payment milestones (we prefer staged payments tied to deliverables, not upfront).

7. Deliverables

- Source code with full IP assignment, no third-party encumbrance.

- Published iOS and Android apps (App Store + Play Store submission included).
- Backend deployed to our cloud account.
- Admin console with role-based access.
- Architecture docs, API reference, on-call runbook.
- 60-day post-launch warranty / bug-fix window.
